Pupil premium strategy statement

This statement details our school's use of pupil premium (and recovery premium for the 2022 to 2023 academic year) funding to help improve the attainment of our disadvantaged pupils.

It outlines our pupil premium strategy, how we intend to spend the funding in this academic year and the effect that last year's spending of pupil premium had within our school.

School overview

Detail	Data
School name	Bader Academy
Number of pupils in school	98
Proportion (%) of pupil premium eligible pupils	47.95%
Academic year/years that our current pupil premium strategy plan covers (3 year plans are recommended)	September 2022 to September 2024
Date this statement was published	December 2022
Date on which it will be reviewed	July 2023
Statement authorised by	Viki Drew- Headteacher
Pupil premium lead	Laura Ward
Governor / Trustee lead	Jacky Tattershall

Funding overview

Detail	Amount
Pupil premium funding allocation this academic year	£44966.66
Recovery premium funding allocation this academic year £34298.00	
Pupil premium funding carried forward from previous years (enter £0 if not applicable)	£0
Total budget for this academic year	£79264.66
If your school is an academy in a trust that pools this funding, state the amount available to your school this academic year	

Part A: Pupil premium strategy plan

Statement of intent

When making decisions about how to use pupil premium to improve disadvantaged pupils' attainment, the needs of all pupils in the school are evaluated. The funding is then allocated with the aim of making maximum impact in the school, whilst embracing the Change Maker Principles that underpin our philosophy of education, and ensuring that our ethos of 'Be Kind, Be Safe and Be Ready' are promoted across school. Every decision made has the child at the heart and centre of it.

We analyse all pupil information, with a clear focus on promoting social relationships, building trust with unfamiliar adults and supporting pupils and their families to engage in educational contexts. Through this analysis, we recognised the need to embed a nurture curriculum that supported all pupils to develop skills needed for future learning.

Our focus is to fulfil the highest aspirations in progress to achieve their full potential both academically and personally. Our focus is in developing the whole child so that they become well rounded individuals, preparing them for the next stage in their education. In line with the DfE guidance, the funding is not only spent on eligible pupils.

Research by the Education Endowment Foundation (EEF) suggests that some of the most effective spending will be on whole school strategies, including improving the quality of teaching. Their report highlights that improving the impact of teachers on pupil achievement in the UK revealed that the effects of high-quality teaching are especially significant for pupils from a disadvantaged background – evidence demonstrated the equivalent of 1.5 years' worth of learning. Our pupil premium strategy is rooted in our whole-school ethos. We know that if you provide high-quality teaching that is effective for disadvantaged learners, then you are providing effective teaching for all.

Challenges

This details the key challenges to achievement that we have identified among our disadvantaged pupils.

Challenge number	Detail of challenge
1	Pupils wellbeing, social isolation within the community in addition to isolation as a result of COVID-19 and being out of education for some young people
2	Low levels of resilience, leading to low expectations, poor independence skills and inability to problem solve / connect areas of learning
3	Sensory processing difficulties
4	Attainment and progression of pupils in receipt of pupil premium, prior educational experiences linked to emotional difficulties, emotional awareness and emotional literacy, including understanding of social experiences
5	Many pupils have social and emotional needs that impact on relationships, learning and progress

Intended outcomes

This explains the outcomes we are aiming for **by the end of our current strategy plan**, and how we will measure whether they have been achieved.

Intended outcome	Success criteria
To strengthen key systems to ensure disadvantaged pupils' individual needs are addressed so that they make good progress compared to their peers	Outcomes for disadvantaged pupils will be so that progress and achievement for disadvantaged and non-disadvantaged children have a positive comparisons, and are in line with national for disadvantaged children.
	Evaluation of gaps in learning to be reflected in Education Health and Care Plans through the annual review process and person centred reviews.
To strengthen the support for those pupils whose social and emotional needs are having an adverse impact on their attainment and achievement	Increased number of pupils in receipt of pupil premium are offered the opportunity to access social and emotional support through Early Help, SEND systems in school and external agencies involved with school.
	In time this will provide social and emotional education for children, ensuring that there is less impact on attainment and achievement, working towards progress and attainment for disadvantaged children. Pupils will access support through the service of Unravel and via school ELSA trained practitioners.
To strengthen engagement of pupils in receipt of pupil premium, with a focus on support for	Increased number of parents in school for engagement opportunities.

parents to support pupils through the work of Family Partnership and Behaviour Team	Outcomes (progress and attainment) for disadvantaged pupils will be raised by securing positive engagement with school and improving attendance where necessary targeting disadvantaged students on attendance. Early Help referrals completed timely and support given to families in evaluated and linked back to SDP.
To continue to develop strategies across school that support staff to enable pupils to feel safe and regulated.	PACE and WINE strategies used in school to proactively support young people using a Trauma Informed approach to enable shared experiences with young people. Incident reports will be reduced and the number of incidents will continue to decrease. Restorative approaches to be embedded and used strategically.

Activity in this academic year

This details how we intend to spend our pupil premium (and recovery premium funding) this academic year to address the challenges listed above.

Teaching (for example, CPD, recruitment and retention)

Budgeted cost: £39,652.39

Activity	Evidence that supports this approach	Challenge number(s) addressed
TA training; both internal and external Increased Teaching Assistant hours across	Evidence suggests that TAs can have a positive impact on academic achievement. In the most positive examples, it is likely that support and training will have been provided for both teachers and TAs so that they understand how to work together effectively, e.g. by making time for discussion before and after lessons. There is also evidence that working with TAs can lead to improvements in pupils' attitudes, and also to positive effects in terms of teacher morale and reduced stress.	1 4 5
school for staff training	EEF - https://educationendowmentfoundation.org.uk/education-evi- dence/teaching-learning-toolkit/teaching-assistant-interventions	
Teaching CPD – improving	The best available evidence indicates that great teaching is the most important lever schools have to improve pupil attain- ment. Ensuring every teacher is supported in delivering high-	1 3
quality first teaching across a	quality teaching is essential to achieving the best outcomes for all pupils, particularly the most disadvantaged among them.	4 5
broad and balanced curriculum	EEF - https://educationendowmentfoundation.org.uk/support-for-schools/school-planning-support/1-high-quality-teaching	
All Aboard Phonics Systematic Synthetic Phonics	Phonics approaches have been consistently found to be effective in supporting younger readers to master the basics of reading, with an average impact of an additional four months' progress. Research suggests that phonics is particularly beneficial for younger learners (4-7 year olds) as they begin to	
Reading for Pleasure across the school	read. Teaching phonics is more effective on average than other approaches to early reading (such as whole language or alphabetic approaches), though it should be emphasized that effective phonics techniques are usually embedded in a rich	
	literacy environment for early readers and are only one part of a successful literacy strategy. The teaching of phonics should be explicit and systematic to support children in making	
	connections between the sound patterns they hear in words and the way that these words are written.

	All Aboard Phonics - All Aboard Learning — Phonics teaching made easy and effective SSP Teaching Programmes - Systematic synthetic phonics (SSP) teaching programme validation - GOV.UK (www.gov.uk)	

Targeted academic support (for example, tutoring, one-to-one support structured interventions)

Budgeted cost: £38,765.00

Activity	Evidence that supports this approach	Challenge number(s) addressed
Unravel – SEMH Support	Social and emotional learning approaches have a positive impact, on average, of 4 months' additional progress in academic outcomes over the course of an academic year. Social and emotional learning, if embedded and supported with explicit teaching, ensures that pupil outcomes are improved and really matters for their outcomes. There is a need for some young people to have targeted support in developing social and emotional learning skills for their future. Whilst embedding this as a part of daily practice, external support ensures that those most at risk received the support needed to engage in their learning, make progress in social learning and in developing relationships for the future. EEF - Social and emotional learning EEF (educationendowmentfoundation.org.uk) EEF Social and Emotional Learning.pdf (educationendowmentfoundation.org.uk) GOV - SEN Support- A Rapid Assessment https://www.gov.uk/government/publications/special-educational-needs-support-in-schools-and-colleges	1 2 5
Sensory Processing Occupational Therapy – young people	Occupational therapy is important for children's development, health and wellbeing. Occupational therapists enable young people with physical, learning and mental health needs to participate and successfully manage the activities that they need or want at home, at school and in the community. Occupational therapists have the skills and expertise to identify the personal, task, environmental factors that support or inhibit children's development, participation and achievements. Occupational Therapists have the ability to provide targeted interventions on a 1:1 basis, in small groups and in supporting staff to embed strategies into daily practice so that young people continue to receive the additional support that they need to succeed. National Autistic Society - Why is occupational therapy important for autistic children? Royal College of Occupational Therapist - https://www.rcot.co.uk/file/4180/download?token=5l93_4_o	1 2 3

Speech & Language Therapy	On average, oral language approaches have a high impact on pupil outcomes of 6 months additional progress over the course of a year. Some evidence suggests that improved language development has seen improvements in classroom environments and in behavioural issues. It is important that spoken language activities are matched to pupils' current stage of development, so that it extends their learning and connects with the curriculum. The Speech and Language Therapist has been working with staff to identify current levels in relation to speech and language and provide interventions based on level of understanding. Support from speech and language therapists has ensured that staff role model language expectations and ensure that they develop children's oral language and vocabulary development. Approaches that focus on oral development have seen an increase in children's attainment across the curriculum. EEF - Oral language interventions EEF (educationendowmentfoundation.org.uk)	1 2 3 4
Independent Travel Training	For young people with SEND developing the skills to travel independently within their community enables them to develop the confidence and self-esteem they need in order thrive within their own society. It allows young people in the SEND community to have lived experiences that enable them to develop the social knowledge to be successful, developing skills needed for the futures. Embedding this approach in young people's EHCP transitions allows young people to be supported by trusted adults to develop new skills and solidify existing skills and knowledge. Doncaster LA - Independent Travel Training - Doncaster Council	1 2 4
Provision of Targeted External Learning Experiences	Young people with SEND may require additional support not available within the standard curriculum offer, and alternative external learning experiences allows them to develop their abilities in a non-classroom based environment, either independently or as part of a small group; this also allows them to develop their social knowledge and skills, and links to outcomes contained within their Educational Health Care Plan. Embedding these approaches allows them to become successful and develops confidence to enable them to then access additional classroom based learning around the activities undertaken. Council for Learning Outside the Classroom -	1 2 3 4 5

Wider strategies (for example, related to attendance, behaviour, wellbeing)

Budgeted cost: £8,062.00

Activity	Evidence that supports this approach	Challen ge number (s) address ed
Family and Behaviour Team introduced to support attendance, early help, behaviour, and referrals to additional service both internal and external.	Poor school attendance is a significant problem in the UK and many other countries across the world. In 2019/20, it was reported as 4.9% overall, with special schools showing a higher rate equal to 10.5% and persistent absence at 13.1% in England (gov.uk 2020). Research has found that poor attendance is linked to poor academic attainment across all stages (Balfanz & Byrnes, 2012; London et al., 2016) as well as anti-social characteristics, delinquent activity and negative behavioural outcomes (Gottfried, 2014; Baker, Sigmon, & Nugent, 2001). However, evidence suggests that small improvements in attendance can lead to meaningful impacts for these outcomes. The importance of parent engagement in children's learning is widely acknowledged (e.g. Goodall 2017), indeed the evidence suggests that it has many benefits, such as improvements in literacy and maths skills (Van Voorhis et al. 2013), better school attendance (McConnell and Kubina 2014) and closure of the achievement gap (Goodall 2017). A review published over 15 years ago (Desforges and Abouchaar 2003) found that parental involvement at home had a significant positive effect on children's achievement after adjusting for other factors influencing attainment. Attendance interventions rapid evidence assessment EEF (educationendowmentfoundation.org.uk) Parental engagement EEF (educationendowmentfoundation.org.uk)	1 2 3 4 5
ELSA approach in school, staff training	ELSA (Emotional Literacy Support Assistant) intervention was developed by Educational Psychologists to support the emotional needs of pupils from within schools. It recognises that children learn better and are happier in school if their emotional needs are also addressed. These sessions support and equip children with the language they need to support their needs.	1 2 5
	Evidence suggests that children from disadvantaged backgrounds have, on average, weaker social and emotional learning skills at all ages than their more affluent	

	peers. These skills are likely to influence a range of outcomes for pupils: lower social and emotional learning skills are linked with poorer mental health and lower academic attainment. Social and emotional literacy interventions in education are shown to improve social and emotional literacy skills and are therefore likely to support disadvantaged pupils to understand and engage in healthy relationships with peers and emotional self-regulation, both of which may subsequently increase academic attainment.	
	EEF - Social and emotional learning EEF (educationendowmentfoundation.org.uk)	
Trauma Informed Practice training	Adverse Childhood Experiences are highly stressful and potentially traumatic events that occur in early childhood or as children develop through the stages. Evidence has shown that adverse trauma and experiences can have a long lasting impact on children and young people's mental health and in forming relationship with others.	1 2 3 4 5
	Trauma-Informed Care is a strengths based framework that is grounded in an understanding of, and responsiveness to, the impact of trauma, that emphasises physical, psychological and emotional safety for both providers and survivors, and that creates opportunities for survivors to rebuild a sense of control and empowerment. (Hopper et al, 2005).

Total budgeted cost: £86,479.39

Part B: Review of outcomes in the previous academic year

Pupil premium strategy outcomes

This details the impact that our pupil premium activity had on pupils in the 2021 to 2022 academic year.

Our internal assessment and quality assurance measures have indicated that disadvantaged pupils made small steps progress in Reading, Writing and Maths. However, for Writing and Maths that rate of progress was slower for those pupils who are disadvantaged compared to all pupils. In Reading, disadvantaged pupils progressed at the same rate as all pupils.

These progress outcomes in general were lower than anticipated, however over the course of the year the number of pupils in receipt of Pupil Premium has changed due to cohorts starting in September 2021, January and April 2022. This has an impact on the data. In addition to this, our assessments have indicated that Covid-19 has continued to have an impact on the progress of young people. This has had a negative impact on teaching of all subject areas to varying degrees, particularly limiting opportunities to access school and the additional provisions provided. We have attempted to mitigate the impact on outcomes by providing home learning for pupils, however due to their SEND needs and autism, this was particularly challenging for some pupils.

Throughout the course of this school year, we have begun to develop our Care Designed to Support Learning offer. This includes:- Sensory Occupational Therapy provided by Fresh Start, Speech and Language Therapy provided by We Communicate, Mental Health support provided by Unravel, Emotional Literacy Support Assistants and Trauma informed training and practices across school. Pupils are building relationships with those working with them on their care designed to support learning and due to varying factors (e.g. past experiences and trauma) additional time is needed to further establish and embed these provisions for our pupils in order to have the highest impact possible.

We have invested in high quality CPD for all staff across the school including the understanding of Rosenshine's Principles of Instruction, Science of Learning and Restorative Approaches and practices. This can be seen throughout school and will continued to be developed and embedded across the next two years of this plan.

Externally provided programmes

Please include the names of any non-DfE programmes that you purchased in the previous academic year. This will help the Department for Education identify which ones are popular in England

Programme	Provider
Unravel	Unravel
Sensory Occupational Therapy	Fresh Start Kids Therapy
Speech and Language Therapy	We Communicate
